Projects

Real-Time Sign Language to Speech Conversion (AI-Based)

- Developed an AI-based system to convert sign language gestures into speech.
- Used machine learning techniques to improve recognition accuracy.
- Enhanced accessibility for speech-impaired communication.
- Tech: Python, OpenCV, CNN, Speech Recognition

Emotion Detection System

- Developed a machine learning system to detect human emotions from facial expressions/text inputs.
- Applied preprocessing techniques such as noise reduction, normalization, and feature extraction.
- Built classification models to identify emotions (happy, sad, angry, etc.) with improved prediction accuracy.
- Tech: Python, OpenCV, scikit-learn / Deep Face

Data Sense Pro (AI Analytics Tool)

- Built a generative AI-powered analytics tool to process and analyze CSV/PDF datasets using natural language queries.
- Processed datasets with 4000+ records, generating automated insights such as statistical summaries and visualizations.
- Implemented secure API key handling using environment variables
- Developed an interactive UI using Streamlit for user-friendly data exploration.

Technical Skills

Languages: Python

Tools: VS Code, GitHub, Eclipse, Jupyter Notebook

Concepts: Machine Learning, NLP, Data Analysis

Soft Skills: Communication, Problem Solving, Time Management, Critical Thinking

Certifications

- AIML for Engineers – Simplilearn (IBM), July 2025
- Python Certificate – GeeksforGeeks, July 2025

Achievements

- Strong foundation in AI/ML concepts with multiple hands-on projects
- Demonstrated problem-solving and analytical skills through academic work
- 3rd Place – IBM ICE Day Paper Presentation

Languages: Telugu, English

Thank you for taking the time to review my resume. I am looking forward to the opportunity to grow and thrive in a dynamic environment.
